ACCU-PROBE™ TEMPERATURE GAUGE

Safely and instantly read the internal temperature of your grill with the lid closed. This thermometer has a wide temperature measurement range from 0° to 370°C (0° to 700°F) and includes the ideal smoking and searing range.

ROGUE

FEATURES

EXCLUSIVE CROSS-OVER LIGHTING SYSTEM

Napoleon's cross-over lighting provides a fail safe system ensuring each burner can be lit with the other, one handed operation and will re-light if wind blows it out in extreme conditions.

Robust Ergonomic Control Knobs

Like the steering wheel of a car, the smooth grip and robust shape enhances your grilling experience.

Sleek Lid

Lifts easily and retains heat for oven like performance.

Integrated Tool Hooks

Place tools close at hand on the tool hooks on each side shelf keeping the side shelves free for prepping.

Enclosed Cart Design

The enclosed cart hides the propane tank adding storage space and provides protection from the elements.

Porcelainized Cast Iron Iconic WAVE™ Cooking Grids

These iconic reversible wave grids provides a perfect sear on the one side while the other side with it's channels keep juices close to the meat.

Dual-Level Stainless Steel Sear Plates

The multi-level set up creates even heat distribution and protects the burners.

Durable Cast Aluminum Fire Box

The fire box resists rust on a superior level and is backed by a new 15 year bumper to bumper warranty.

Folding Side Shelves in Durable Black Powder Coat

Tuck your grill out of the way giving you extra space when needed with the folding side shelves.

ACCU-PROBE™ Temperature Gauge with Smoke and Sear Range

Accurately reads the temperature of your grill for optimal temperature control when BBQing.

Built-in Propane Tank Ring

Securely holds the propane tank within the cabinet for easy positioning and safe mobility for storage.

Instant JETFIRE™ Ignition

This innovative and easy to use ignition system shoots a jet of flame to light each gas burner individually for quick start-ups.

Large Chrome Plated Warming Rack

New extra deep warming rack adds extra space for additional cooking area.

CHARCOAL FLAVOR FROM YOUR GAS GRILL

Napoleon's optional charcoal tray is designed to let you add the fun & flavor of charcoal anytime on your gas grill. Simply replace sear plates with the charcoal tray, add charcoal and light with your gas burner.

ROGUE^{XT}

SAME AS ROGUE

+ ADDITIONAL FEATURES

**INFRARED SIZZLE ZONE™
SIDE BURNER**

Napoleon infrared grills use ceramic burners with thousands of evenly spaced flame ports to generate infrared radiant energy. The flame energy is absorbed by the ceramic, which then glows and heats up to an incredible 1800°F. This remarkable SIZZLE ZONE™ heat intensity quickly sears your food to lock in moisture and flavor.

DURABLE CAST ALUMINUM FIRE BOX

The firebox is virtually indestructible and it resists rust on a superior level. It is backed by a new 15 Year Bumper to Bumper Warranty.

COOKING WITH CHARCOAL ON YOUR GAS GRILL

A Napoleon Exclusive! Still want the convenience of gas, but long for that charcoal flavor? No problem! Napoleon's charcoal tray lights easily with your gas burner. No need for lighter fluid!

The optional charcoal tray gives you the freedom to switch from gas to charcoal with relative ease. Simply replace your sear plates with the charcoal tray, fill with charcoal and light using your gas burners. Replace your cooking grids and now you're charcoal grilling!

Before you begin to use your charcoal tray, you will need to determine how much charcoal you are going to need. Approximately one layer for burgers or steaks and two layers for roasts or chicken. Pour enough charcoal into the tray to make the layers needed. Light the gas burner(s) directly under the charcoal tray and burn on high until the charcoal is glowing red and then turn off the gas burner(s). Let coals burn until all coals are white on the surface. With a long handle instrument, spread the coals evenly across the tray.

WANT THAT SMOKED GOODNESS?

Enjoy that delicious smoked meat flavor at home with your own grill and a few pointers from Napoleon. When using gas grills, it's best to put presoaked wood chips in our smoker tube, available at Napoleon grill retailers. This keeps your grill from filling up with ashes and clogging the jets. If you are using a charcoal tray, then you can either put the wood directly on the preheated coals or place them in the wood chip chamber in the tray.

Fill the stainless steel smoker tube with wood chips. Submerge in water for at least half an hour. Place the smoker tube over the left burner and turn it on. Place your meat over the right burner, but do not turn on the burner. You are using the indirect smoking cooking method.

Smoke the meat for several hours under a closed lid. To achieve maximum flavor, add fresh, pre-soaked wood chips several times during the cooking process or use two tubes.

HOW DOES INFRARED COOKING WORK?

Since the discovery of fire, humanity has been striving to improve taste and perfect the grilling experience. Infrared grilling is simply the relationship between the type of food, heat, and time. Infrared cooking uses high-efficiency radiant energy, much like the sun. High-frequency electromagnetic waves from the invisible end of the light spectrum travel from the infrared source to the food. Napoleon infrared grills use ceramic burners with thousands of evenly spaced flame ports to generate infrared radiant energy. The flame energy is absorbed by the ceramic, which then glows and heats up to an incredible 1800°F. This remarkable **SIZZLE ZONE™** heat intensity quickly sears your food to lock in moisture and flavor. The results are unmistakable - succulent, flavorful food in a much-reduced grilling time! Napoleon's infrared grilling technology makes serving the perfect meal quick and easy each and every time.

Versatile

Grill anything like a professional; from steaks to seafood to vegetables.

Great Retention of Flavor and Moisture

Infrared provides the heat necessary to lock in the juices with little or no preheating time. Radiant energy is delivered more directly to the food, and warms less air. Therefore, the food cooks very quickly, resulting in a greater retention of food weight. Food cooked in its own juices is more succulent, tender and tasty.

NAPOLEON
EXPERTS IN
GAS & INFRARED
GRILLING

More Efficient

Infrared heats the object not the air so it cooks twice as fast as traditional burners while using less fuel. Because infrared heats food directly, not the air around it, grilling year round is much easier.

BTU Consumption

Traditional Grilling

Napoleon Infrared Grilling

The Environmental Choice!

Infrared burners are ready to grill in under a minute so grilling time is drastically decreased. Cooking your food with Napoleon's advanced infrared technology can reduce your gas consumption by up to 50%.

0→1800° READY-TO-GRILL IN 30 SECONDS

HOW TO COOK THE PERFECT INFRARED STEAK

1. Lift lid of grill or side burner.
2. Ignite infrared burner.
3. Warm up for one minute.
4. Place thick, juicy steak on grids.
5. Wait two or three minutes, flip steak with tongs. (You do not want to use a fork and pierce the steak as this will let out the juices the infrared has locked in).
6. Wait another two or three minutes then turn off the infrared burner.
7. You now have a medium rare steak.
8. Bon appetite

TIP:

Pick a steak that is well marbled; the more marble there is inside, the more flavorful and tender your steak will be. A perfect steak size is about 1 ½ to 2 inches thick and about 12 to 16 ounces each, depending on the cut.
