Safety information

Before using your new Samsung Refrigerator, please read this manual thoroughly to ensure that you know how to operate the features and functions that your new appliance offers safely and efficiently.

What you need to know about the safety instructions

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
- Because the following instructions cover various models, the characteristics of your refrigerator may differ slightly from the refrigerator described in this manual.
- If you have any question, contact us at 1-800-SAMSUNG or find help and information online at www.samsung.com.
- Refrigerant squirting out of the pipes could ignite or cause an eye injury. When
 refrigerant leaks from the pipe, avoid any naked flames and move anything flammable
 away from the product and ventilate the room immediately.
 - Failing to do so may result in fire or explosion.
- Improper use of the grounding plug can result in a risk of electric shock. If it is necessary to use an extension cord, use only a 3-wire extension cord that has a 3-blade grounding plug and a 3-slot receptacle that will accept the plug on the appliance. The marked rating of the extension cord should be AC 115-120 V, 10 A, or more. If a grounding adapter is used, make sure the receptacle box is fully grounded.

Important safety symbols and precautions:

Please follow all safety instructions in this manual. This manual uses the following safety symbols.

⚠ WARNING

Hazards or unsafe practices that may result in severe personal injury, property damage, and/or death.

! CAUTION

Hazards or unsafe practices that may result in severe personal injury and/or property damage.

Useful information that helps users understand or benefit from the refrigerator.

These warning signs are here to prevent injury to you and others.

Please follow them carefully.

After reading this section, keep it in a safe place for future reference.

State of California Proposition 65 Warning

∕!\ WARNING

Cancer and Reproductive Harm - www.P65Warnings.ca.gov.

Important safety precautions

WARNING; Risk of fire / flammable materials

♠ WARNING

- R-600a is used as a refrigerant. This product contains flammable gas (Refrigerant R-600a), contact your local authority in regard to safe disposal of this product.
- In order to avoid the creation of a flammable gas-air mixture if a leak in the refrigerating circuit occurs, the size of the room in which the appliance may be sited depends on the amount of refrigerant used. The room must be 35.3 ft³ in size for every 8 g of R-600a refrigerant inside the appliance.
- The installation location should not be exposed to direct sunlight and not placed near any electric appliance or heat source, e.g. stove, oven or hob, radiator, etc.

Untitled-34 5 2025-03-31

Safety information

- If you use two products side by side, for safety reason, be sure to use certified products in explosive gas atmospheres.
- Never start up an appliance showing any signs of damage. If in doubt, consult your dealer.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- The socket must be easily accessible so that the appliance can be quickly disconnected from the supply in an emergency. It must be outside the area of the rear of the appliance.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- New hose-sets supplied with the appliance are to be used and that old hose-sets should not be reused.
- When positioning the appliance, ensure the supply cord is not trapped or damaged.
- Do not locate multiple portable socket-outlets or portable power supplies at the rear of the appliance.

WARNING

- Fill with potable water only.
- Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
- Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- Do not damage the refrigerant circuit.
- Do not use electrical appliances inside the food storage compartments of The appliance, unless they are of the type recommended by the manufacturer.
- Connect to potable water supply only.

⚠ WARNING

- Risk of child entrapment. Before you throw away your old refrigerator or freezer:
 - Take off the doors.
 - Leave the shelves in place so that children may not easily climb inside.

A CAUTION

- Risk Of Fire Or Explosion. Flammable Refrigerant Used. Do Not Use Mechanical Devices To Defrost Refrigerator. Do Not Puncture Refrigerant Tubing.
- Risk Of Fire Or Explosion. Flammable Refrigerant Used. To Be Repaired Only By Trained Service Personnel. Do Not Puncture Refrigerant Tubing.
- Risk Of Fire Or Explosion. Flammable Refrigerant Used. Consult Repair Manual/Owner's Guide Before Attempting to Service This Product. All Safety Precautions Must Be Followed.
- Risk Of Fire Or Explosion. Dispose Of Properly In Accordance With Federal Or Local Regulations. Flammable Refrigerant Used.
- Risk Of Fire Or Explosion Due To Puncture Of Refrigerant Tubing; Follow Handling Instructions Carefully. Flammable Refrigerant Used.
- To Prevent A Child From Being Entrapped, Keep Out Of Reach Of Children And Not In The Vicinity Of Freezer Or Refrigerator.

This appliance is intended to be used in household and similar applications such as

- staff kitchen areas in shops, offices and other working environments;
- farm houses and by clients in hotels, motels and other residential type environments;
- bed and breakfast type environments;
- catering and similar non-retail applications.

Severe warning signs for transportation and site

⚠ WARNING

- When transporting and installing the appliance, care should be taken to ensure that no parts of the refrigerating circuit are damaged.
 - Refrigerant leaking from the pipe work could ignite or cause an eye injury. If a leak is detected, avoid any naked flames or potential sources of ignition and air the room in which the appliance is standing for several minutes.
 - This appliance contains a small amount of isobutane refrigerant (R-600a), a natural gas with high environmental compatibility that is, however, also flammable.

Safety information

Critical installation warnings

⚠ WARNING

- Do not install the refrigerator in a damp location or place where it may come in contact with water.
 - Deteriorated insulation on electrical parts may cause an electric shock or fire.
- Do not place this refrigerator in direct sunlight or expose it to the heat from stoves, room heaters, or other appliances.
- Do not plug several appliances and the refrigerator into the same multiple power strip. The refrigerator should always be plugged into its own individual electrical outlet which has a voltage rating that matches the voltage listed on the refrigerator's rating plate.
 - This provides the best performance and also prevents overloading of house wiring circuits, which could overheat the wires and cause a fire hazard.
- If the wall socket is loose, do not insert the power plug.
 - There is a risk of electric shock or fire.
- Do not use a power cord that has cracks or abrasion damage along its length or at either end.
- Do not bend the power cord excessively or place heavy objects on it.
- Do not pull or excessively bend the power cord.
- Do not twist or tie the power cord.
- Do not hook the power cord over a metal object, place a heavy object on the power cord, insert the power cord between objects, or push the power cord into the space behind the appliance.
- When moving the refrigerator, be careful not to roll over or damage the power cord.
 - This may result in an electric shock or fire.
- Never unplug your refrigerator by pulling on the power cord. Always grip the plug firmly and pull straight out from the outlet.
 - Damage to the cord may cause a short-circuit, fire, and/or electric shock.
- Do not install this appliance near a heater or flammable material.
- Do not install this appliance in a location where gas may leak.
 - This may result in an electric shock or fire.
- This refrigerator must be properly located and installed in accordance with the instructions in this manual before you use it.
- Connect the power plug in the proper position with the cord hanging down.
 - If you connect the power plug upside down, the wire can get cut off and cause a fire or electric shock.
- Make sure that the power plug is not crushed or damaged by the back of the refrigerator.
- Keep the packing materials out of reach of children.
 - There is a risk of death from suffocation if a child puts the packing materials on his
- The appliance must be positioned so that the plug is accessible after installation.
 - Failing to do so may result in an electric shock or fire due to electric leakage.
- Do not install this appliance in a humid, oily or dusty location, or in a location exposed to direct sunlight or to water (rain drops).

8 English

- Deteriorated insulation on electrical parts may cause an electric shock or fire.

Untitled-34 8

- If large amounts of dust or water enter the refrigerator, disconnect the power plug and contact a Samsung Electronics service center.
 - Otherwise there is a risk of fire.
- Do not stand on top of the appliance or place objects (such as laundry, lighted candles, lighted cigarettes, dishes, chemicals, metal objects, etc.) on the appliance.
 - This may result in an electric shock, fire, problems with the product, or injury.
- You need to remove all the protective plastic film before you initially plug the product in.
- Children should be supervised to ensure that they do not play with the snap rings used for door adjustment or the water tube clips.
 - There is risk of death by suffocation if a child swallows a snap ring or water tube clip. Keep the snap rings and water tube clips out of children's reach.
- The refrigerator must be safely grounded.
 - Always make sure that you have grounded the refrigerator before attempting to investigate or repair any part of the appliance. Power leakages can cause severe electric shock.
- Never use gas pipes, telephone lines, or other potential lightning attractors as an electrical ground.
 - You must ground the refrigerator to prevent any power leakages or electric shocks caused by current leakage from the refrigerator.
 - Current leakage may result in an electric shock, fire, explosion, or problems with the product.
- Plug the power plug into the wall socket firmly. Do not use a damaged power plug, damaged power cord, or loose wall socket.
 - This may result in an electric shock or fire.
- Only a qualified technician or service company should be allowed to change the fuse in the refrigerator.
 - Failing to do so may result in an electric shock or personal injury.

Installation cautions

! CAUTION

- Allow sufficient space around the refrigerator and install it on a flat surface.
 - Keep the ventilation space in the appliance enclosure or mounting structure clear of obstructions.
- After you have installed the refrigerator and turned it on, allow the appliance to stand for 2 hours before loading it with food.
- It is strongly recommended you have a qualified technician or service company install the refrigerator.
 - Failing to do so may result in an electric shock, fire, explosion, problems with the product, or injury.

English 9

Overloading one door may make the refrigerator fall, causing physical injury.

Safety information

Critical usage warnings

MARNING

- Do not insert the power plug into a wall socket with wet hands.
 - This may result in an electric shock.
- Do not store articles on the top of the appliance.
 - When you open or close the door, the articles may fall and cause personal injury and/or material damage.
- Do not insert hands, feet, or metal objects (such as chopsticks, etc.) into the bottom or the back of the refrigerator.
 - This may result in an electric shock or injury.
 - Any sharp edges may cause a personal injury.
- Do not touch the inside walls of the freezer or products stored in the freezer with wet hands.
 - This may cause frostbite.
- Do not put a container filled with water on the refrigerator.
 - If spilled, there is a risk of fire or electric shock.
- Do not keep volatile or flammable objects or substances (benzene, thinner, propane gas, alcohol, ether, LP gas, and other such products) in the refrigerator.
 - This refrigerator is for storing food only.
 - This may result in fire or explosion.
- Children should be supervised to ensure that they do not play with the appliance.
 - Keep fingers out of "pinch point" areas. Clearances between the doors and cabinet are necessarily small. Be careful when you open the doors if children are in the area.
- Do not let children hang on the door or door bins. A serious injury may occur.
- Do not let children go inside the refrigerator. They could become trapped.
- Do not insert your hands into the area under the appliance.
 - Any sharp edges may cause personal injury.
- Do not store pharmaceutical products, scientific materials, or temperature sensitive products in the refrigerator.
 - Products that require strict temperature controls must not be stored in the refrigerator.
- Do not place or use electrical appliances inside the refrigerator/freezer, unless they are of a type recommended by the manufacturer.
- If you smell smoke, pull out the power plug immediately, and then contact a Samsung Electronics service center.
- If large amounts of dust or water enter the refrigerator, disconnect the power plug and contact your Samsung Electronics service center.
 - Otherwise there is a risk of fire.
 - Do not let children step on a drawer.
 - The drawer may break and cause them to slip.
- Do not leave the doors of the refrigerator open while the refrigerator is unattended and do not let children enter the refrigerator.

10 English

- Do not allow babies or children to go into a drawer.
 - It can cause death from suffocation by entrapment or personal injury.

Untitled-34 10 2025-03-31

- Do not overfill the refrigerator with food.
 - When you open the door, an item may fall out and cause personal injury or material damage.
- Do not spray volatile material such as insecticide onto the surface of the appliance.
 - As well as being harmful to humans, it may also result in an electric shock, fire, or problems with the product.
- Never put fingers or any objects into the water dispenser outlet, ice chute, or ice maker bucket.
 - It may cause a personal injury or material damage.
- Do not use or place any substances sensitive to temperature such as flammable sprays, flammable objects, dry ice, medicine, or chemicals near or inside the refrigerator.
- Do not use a hair dryer to dry the inside of the refrigerator. Do not place a lighted candle in the refrigerator to remove bad odors.
 - This may result in an electric shock or fire.
- Fill the water tank and ice cube trays with potable water only (tap water, mineral water, or purified water).
 - Do not fill the tank with tea, juice, or a sports drink. They can damage the refrigerator.
- Do not stand on top of the appliance or place objects (such as laundry, lighted candles, lighted cigarettes, dishes, chemicals, metal objects, etc.) on the appliance. This may result in an electric shock, fire, problems with the product, or injury. Do not put a container filled with water on the appliance.
 - If spilled, there is a risk of fire or electric shock.
- Never stare directly at the UV LED lamp for long periods of time.
 - This may result in eye strain due to the ultraviolet rays.
- Do not put a fridge shelf into the refrigerator upside down. The shelf stopper will not work.
 - The glass shelf could fall and cause personal injury.
- Keep fingers out of "pinch point" areas. Clearances between the doors and cabinet are necessarily small. Be careful when you open the doors if children are in the area.
- If a gas leak is detected, avoid any naked flames or potential sources of ignition, and air the room in which the appliance is standing for several minutes.
 - Do not touch the appliance or power cord.
 - Do not use a ventilating fan.
 - A spark may result in an explosion or fire.
- Use only the LED Lamps provided by the manufacturer or its service agents.
- Bottles should be stored tightly together so that they do not fall over or out.
- This product is intended only for the storage of food in a domestic environment.
- Do not attempt to repair, disassemble, or modify the refrigerator yourself.
 - Unauthorized modifications can cause safety problems. To reverse an unauthorized modification, we will charge the full cost of parts and labor.
- Do not use any fuse (such as cooper, steel wire, etc.) other than a standard fuse.
- If your refrigerator needs to be repaired or reinstalled, contact your nearest Samsung service center.
 - Failing to do so may result in an electric shock, fire, problems with the product, or injury.
- If the interior or exterior LED lamp has gone out, contact your nearest Samsung service center.

Safety information

- If the refrigerator emits a burning smell or smoke, unplug the refrigerator immediately and contact a Samsung service center.
 - Failing to do so may result in an electric or fire hazards.
- Pull the power plug out of the socket before changing the interior lamps of the refrigerator.
 - Otherwise, there is a risk of electric shock.
- If you experience difficulty changing a non-LED light, contact a Samsung service center.
- If the product is equipped with LED lamps, do not disassemble the Lamp Covers and LED lamps yourself.
 - Contact a Samsung service center.
- Plug the power plug into the wall socket firmly.
- Do not use a damaged power plug, damaged power cord, or loose wall socket.
 - This may result in an electric shock or fire.

Usage cautions

A CAUTION

- Do not re-freeze frozen foods that have thawed completely.
- Use only the ice maker provided with the refrigerator.
- To get the best performance from the product:
 - Do not place food too close to the vents at the rear of the refrigerator as this can obstruct free air circulation in the refrigerator compartment.
 - Wrap food up properly or place it in airtight containers before putting it into the refrigerator.
 - Please observe maximum storage times and expiration dates of frozen goods.
- Do not put glass containers or bottles or carbonated beverages into the freezer.
 - The container may freeze and break, and this may result in injury.
- Service Warranty and Modification.
 - Any changes or modifications performed by a 3rd party on this finished appliance are not covered under Samsung warranty service, nor is Samsung responsible for safety issues that result from 3rd party modifications.
- Do not block the air vents inside the refrigerator.
 - If the air vents are blocked, especially with a plastic bag, the refrigerator can be over cooled. If a cooling period lasts too long, the water filter may break and cause water leakage.
- If the refrigerator is disconnected from the power supply, you should wait for at least five minutes before plugging it back in.
- If large amounts of water enter the refrigerator, pull out the power plug and contact a Samsung service center.
- Do not strike or apply excessive force to any glass surface.
 - Broken glass may result in a personal injury and/or property damage.
- Fill the water tank and ice cube trays with potable water only (tap water, mineral water, or purified water).

12 English

- Do not fill the tank with tea, juice, or a sports drink. They can damage the refrigerator.

Untitled-34 12 2025-03-31 6

- If the refrigerator is flooded, shut off the power to the refrigerator and contact your nearest Samsung service center.
 - There is a risk of electric shock or fire.
- Do not keep vegetable oil in your refrigerator's door bins. The oil can solidify, making it foul-tasting and difficult to use. In addition, the open container can leak and the leaked oil can cause the door bin to crack. After opening an oil container, it is best to keep the container in a cool and shaded place such as a cupboard or pantry.
 - Examples of vegetable oil: olive oil, corn oil, grape-seed oil, etc.

Cleaning cautions

⚠ CAUTION

- Do not spray water directly on the inside or outside of the refrigerator.
 - There is a risk of fire or electric shock.
- Do not use a hair dryer to dry the inside of the refrigerator.
- Do not place a lighted candle in the refrigerator to remove bad odors.
 - This may result in an electric shock or fire.
- Do not spray cleaning products directly on the display.
 - Printed letters on the display may come off.
- If any foreign substance such as water has entered the appliance, unplug the power plug and contact your nearest Samsung service center.
 - Failing to do so may result in an electric shock or fire.
- Use a clean, dry cloth to remove any foreign matter or dust from the power plug blades. Do not use a wet or damp cloth when cleaning the plug.
 - Otherwise, there is a risk of fire or electric shock.
- Do not clean the appliance by spraying water directly onto it.
- Do not use benzene, thinner, or Clorox (bleach) to clean the refrigerator.
 - They may damage the surface of the appliance and may cause a fire.
- Never put fingers or any objects into the dispenser outlet.
 - This can cause a personal injury or material damage.
- Before cleaning or performing maintenance, unplug the appliance from the wall socket.
 - Failing to do so may result in an electric shock or fire.
- Use a clean sponge or soft cloth and a mild detergent in warm water to clean the refrigerator.
- Do not use abrasive or harsh cleansers such as window sprays, scouring cleansers, flammable fluids, muriatic acid, cleaning waxes, concentrated detergents, bleaches, or cleansers containing petroleum products on exterior surfaces (doors and cabinet), plastic parts, door and interior liners, and gaskets.
 - These can scratch or damage the material.
- Do not clean glass shelves or covers with warm water when they are cold. Glass shelves and covers may break if exposed to sudden temperature changes or impacts such as bumping or dropping.

Safety information

Critical disposal warnings

MARNING

- Children trapped inside a refrigerator can hurt themselves or suffocate to death.
- Please dispose of the packaging material from this product in an environmentally friendly manner.
- Ensure that none of the pipes on the back of the refrigerator are damaged prior to disposal.
- This product contains R-600a, a flammable gas, which is used as the refrigerant. Contact your local authorities regarding safe disposal of this product.
- When disposing of this refrigerator, remove the door/door seals and door latch so that small children or animals cannot become trapped inside. Children should be supervised to ensure that they do not play with the appliance.
 - If trapped inside, the child could be injured or suffocate to death.
- Cyclopentane is used in the insulation. The gases in the insulation material require a special disposal procedure. Please contact your local authorities in regard to the environmentally safe disposal of this product.
- Keep all packaging materials well out of the reach of children, as packaging materials can be dangerous to children.
 - If a child places a bag over his or her head, the child could suffocate.

Follow these instructions carefully to ensure a proper installation of this refrigerator and to prevent accidents before using it.

⚠ WARNING

- Use the refrigerator only for its intended purpose as described in this manual.
- Any servicing must be performed by a qualified technician.
- Dispose of the product packaging material in compliance with the local regulations.
- To prevent electric shock, unplug the power plug before servicing or replacing parts.

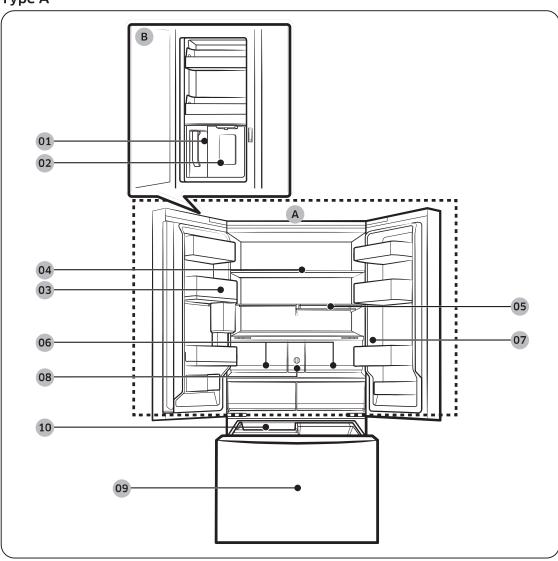

Refrigerator at a glance

The actual refrigerator and provided component parts of your refrigerator may differ from the illustrations in this manual, depending on the model and the country.

Type A

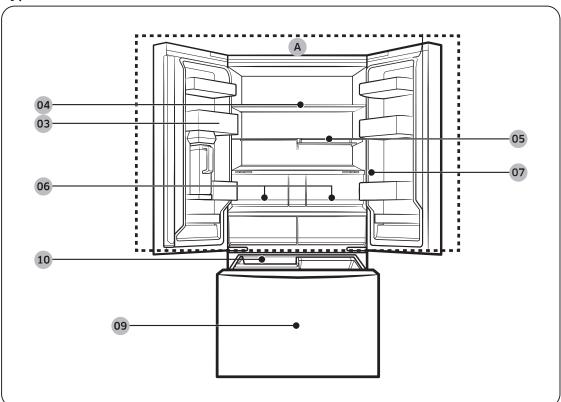

Type B

- **01** AutoFill pitcher *
- **02** Water dispenser **
- 03 Fridge door bin
- **04** Fridge shelf
- **05** Quick Space shelf *
- **06** Crisper+ / Fridge Drawers
- **07** Control panel
- **08** Water filter *
- **09** Freezer
- 10 Ice maker

- **A.** Fridge
- **B.** Beverage Center **
- * Applicable models only
- ** Dispenser models only

NOTE

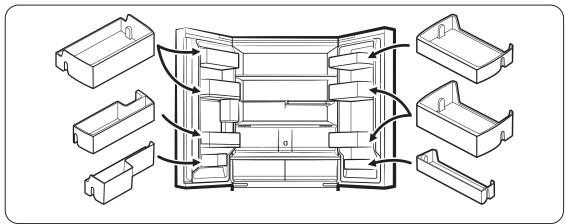

- For energy efficiency, keep all shelves, drawers, and baskets in their original positions.
- When closing the door, make sure the vertical hinged section is in the correct position to avoid scratching the other door.
- If the vertical hinged section is reversed, put it back into the correct position, and then close the door.
- Moisture may form at times on the vertical hinged section.
- If you close a door forcefully, the other door may open.
- If the internal or external LED lamp is not working, contact a local Samsung service center.

Door bins

Your refrigerator ships with door bins of different types and sizes. If the door bins for your refrigerator were packaged separately, use the figure below to help you position the bins properly.

NOTE

The actual refrigerator and provided component parts of your refrigerator may differ from the illustrations in this manual, depending on the model and the country.

Step-by-step installation

STEP 1 Select a site

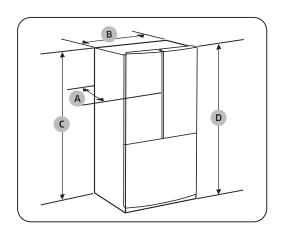

The site must:

- Have a solid level surface without carpeting or flooring that may obstruct ventilation
- Be out of direct sunlight
- Have adequate room for opening and closing the door
- Be away from any heat source
- Provide room for maintenance and servicing
- Have a temperature range between 50 °F (10 °C) and 110 °F (43 °C)

Clearance

Untitled-34 19

See the following figures and tables for installation space requirements.

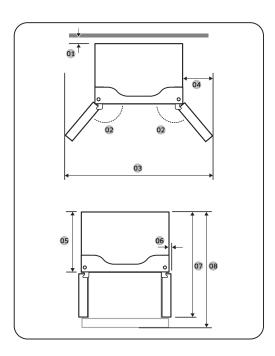

Model	RF24BB6*****	RF30BB6*****
А	28 ⁶ / ₈ " (730 mm)	34 ¹ / ₄ " (868 mm)
В	35 ⁶ /8" (9	908 mm)
С	68 ⁷ /8" (1	749 mm)
D	70" (17	78 mm)

Model	RF24BB6****	RF30BB6*****
01	more than 50 mm recommended	
02	12	25°
03	58 ² /4" (1	485 mm)
04	11 ³ / ₈ " (289 mm)	
05	24" (610 mm)	29 ³ / ₈ " (748 mm)
06	2 ¹ / ₈ " (54 mm)	
07	43" (1093 mm)	48 ² / ₄ " (1231 mm)
08	44 ² / ₄ " (1131 mm)	53 ¹ / ₄ " (1353 mm)

The measurements in the tables may differ slightly from the actual measurements, depending on the measuring and rounding method.

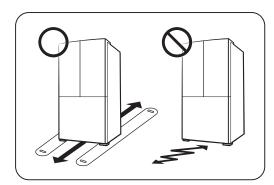

STEP 2 Flooring

If the refrigerator cannot pass through the entrance due to its size, see STEP 3 Door removal for entrance.

NOTE

To prevent floor damage, make sure the front leveling legs are in the upright position.

- The surface you install the refrigerator on must support a fully loaded refrigerator.
- To protect the floor, put a large piece of cardboard along the path to the refrigerator's final installation location.
- Once the refrigerator is in its final position, do not move it unless necessary to protect the floor. If you have to move the refrigerator, place thick paper or cloth such as old carpets along the path of movement.

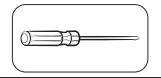

STEP 3 Door removal for entrance

If the refrigerator cannot pass through the entrance to your home or kitchen due to its size, follow these instructions to remove and then re-install the refrigerator's doors. If you do not need to remove the doors, go to page 28 to continue the installation procedure.

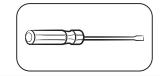

WARNING

Unplug the power cord of the refrigerator before removing the doors.

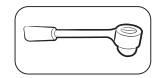

Tools required (not provided)

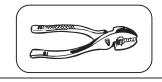

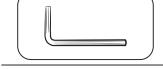

Flat-head screwdriver

Socket wrench ³/₈" (10 mm)

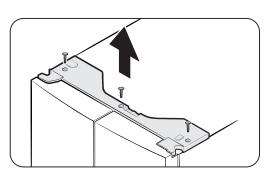

Pliers

Allen wrench 1/4" (5 mm)

Detach the fridge doors

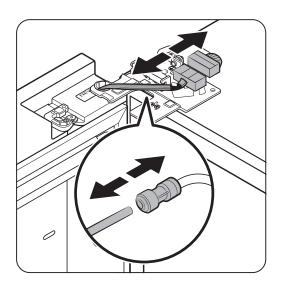

1. With the doors closed, use a Phillips screwdriver to remove the screws (x3) from the top cover. Pull up and remove the top cover with the connectors.

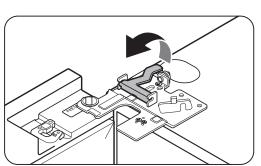

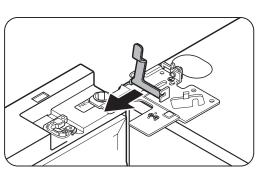

2. Disconnect the two wire connectors on the left door. The position of the connectors differs with the model.

A CAUTION

- Do not remove both doors simultaneously. Make sure to remove one door at a time. Otherwise, any of the doors may fall and cause physical injury.
- Make sure the refrigerator is off before disconnecting the connectors.
- **3.** Disconnect the water tube from the coupler on the left door as shown.
 - This step does not apply to the models without the AutoFill Pitcher and the water dispenser.
- **4.** Gently draw up the clamp in several steps. To prevent finger injuries, do not apply a sudden force to the clamp.

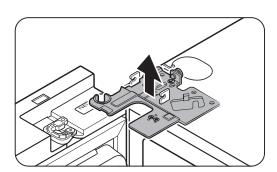

5. Pull the clamp to remove.

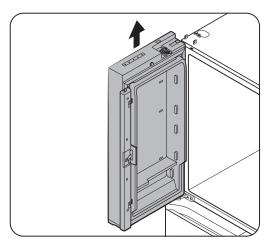

6. Open the door 90 degrees. While holding the door, pull up and remove the top hinge. Be careful not to damage the connector wires when you remove the hinge.

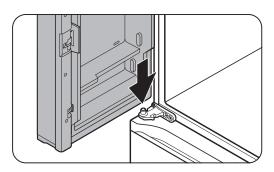

- **7.** Gently pull up the door vertically to remove. Do not apply excessive force to the door. The door may fall, causing physical injury.
- **8.** Lay the door down on a flat surface.
- **9.** Repeat steps 1-8 for the other door, except for step 3. There is no water tube on the right side door.
 - Step 2 does not apply to the models without the Showcase door.

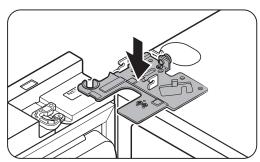

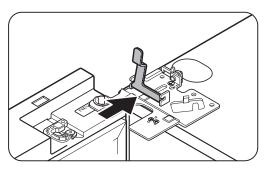

To reattach the fridge doors

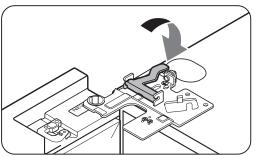

1. While holding the door open by more than 90 degrees, insert the shaft on the middle hinge into the hole on the bottom of the door.

2. Put the top hinge into position on the top of the refrigerator, and then insert the hinge shaft into the top hole of the door. Make sure the wires from the door pass through the hole in the hinge shaft.

3. Insert the clamp in the direction of the arrow.

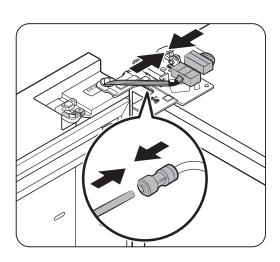

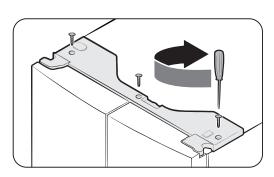

4. Push back the clamp as shown.

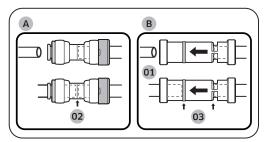

- **01** Dispenser
- **02** Center of transparent coupler
- **03** Guidelines

5. Connect the wire connectors.

A CAUTION

- Make sure the wire connectors are connected properly. Otherwise, the refrigerator may not operate properly.
- 6. Connect the water tube.
 - This step does not apply to the models without the AutoFill Pitcher and the water dispenser.

! CAUTION

- To prevent water leaks, make sure the red clips tighten the coupler properly.
- Keep the clips out of children's reach.
- **7.** Repeat steps 1-5 for the other door.
 - Step 5 does not apply to the models without the Showcase door.
- **8.** Attach the top cover with the front side first, and then press down on its back to get it into position. Then, tighten the screws (x3).

! CAUTION

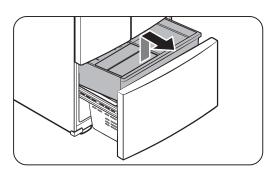

To prevent water leaks from the dispenser, the water line must be fully connected. Make sure both tubes of the water line are inserted fully to the center of transparent coupler (A) or the guidelines (B).

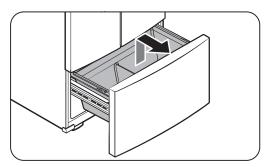

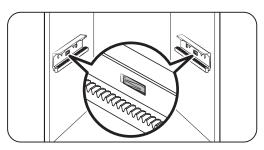

To detach the freezer drawer

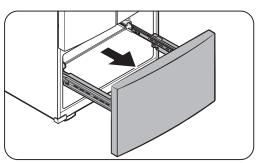

1. Lift up the front of the **upper basket** and pull up to remove.

2. Then, pull up to remove the lower basket from the rail assembly.

3. Press down the hooks to unlock the rail assembly.

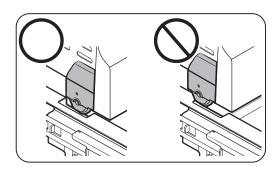

4. While holding the upper area of the freezer drawer front, slide the drawer out all the way to remove the freezer drawer from the rail assembly.

! CAUTION

- Be careful not to scratch or dent the rail assembly.
- Make sure you mount the freezer baskets in the correct position.
 Otherwise, the door will not open or close properly, which causes frost to build up.
- Do not store too much food in the freezer drawer. This prevents the freezer drawer from closing properly, resulting in frost buildup.

To reattach the freezer drawer

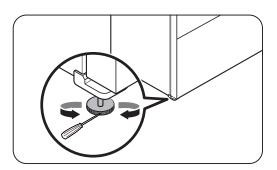

Once the refrigerator is in or near it's final location, re-attach the freezer drawer by following the directions in the reverse order of removal.

STEP 4 Leveling the refrigerator

A CAUTION

- When installed, the refrigerator must be leveled on a flat, solid floor. Not leveling the refrigerator can cause damage to the refrigerator or physical injury.
- Leveling must be performed with the refrigerator empty. Make sure no food items are inside the refrigerator.
- For safety reasons, adjust the front a little higher than the rear.

Level the refrigerator using the special screws (levelers) on the front legs. Use a flat-head screwdriver to turn the levelers.

- To adjust the height of the left side: Insert a flat-head screwdriver into the leveler of the left side front leg. Turn the leveler clockwise to raise the left side or turn it counterclockwise to lower.
- To adjust the height of the right side: Insert a flat-head screwdriver into the leveler of the right side front leg. Turn the leveler clockwise to raise the right side or turn it counterclockwise to lower.

2025-03-31 6:27:34

STEP 5 Adjust the door height and the door gap

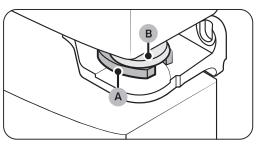

Snap rings

The height of a door can be adjusted using the provided snap rings, which come in 4 different sizes (1 mm, 1.5 mm, 2 mm, and 2.5 mm).

To adjust the height of a door

1. Check the height difference between the doors, and then lift up and hold the door with the lower height.

2. Insert a suitable-sized snap ring (A) between the door grommet (B) and the hinge as shown.

A CAUTION

- Insert only one snap ring. If you insert two or more snap rings, the rings may slip out or make a rubbing noise.
- Keep the snap rings out of children's reach and keep them for future use.
- Do not raise the door too much. The door can contact and damage the top cover.

STEP 6 Connect the water dispenser line (applicable models only)

A water dispenser with a filter is one of the helpful features on your new refrigerator. To help promote better health, the water filter removes unwanted particles from your water. However, it does not sterilize or destroy microorganisms. You may need to purchase a water purifying system to do that.

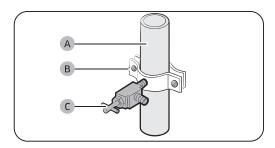

The water line also connects to the ice maker. For the ice maker to operate properly, water pressure must be between 30-125 psi (206-861 kPa).

If the refrigerator is installed in an area with low water pressure (below 30 psi / 206 kPa), you can install a booster pump to compensate for the low pressure.

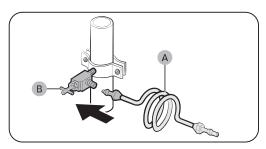

After you have connected the water line, check if the water dispenser works properly. Press the water dispenser lever until the water runs from the water outlet.

NOTE

• Water line installation kits are available at extra cost from your retailer. We recommend using a water line installation kit that contains copper tubing and a 1/4" (6 mm) compression nut.

- 1. Shut off the main water source.
- 2. Insert the pipe clamp (B) and the shutoff valve (C) into the cold water line (A).

3. Connect the water line installation kit (A) to the shutoff valve (B).

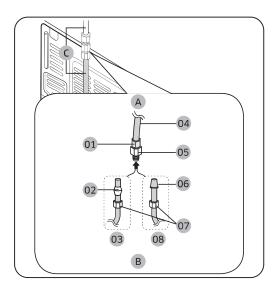

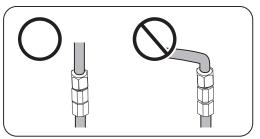

Connect the water supply line to the refrigerator

There are several items you must purchase to complete this connection. You may find these items sold as a kit at your local hardware store.

Copper Tubing	 ¹/₄" copper tubing ¹/₄" compression nut (1 pc) Ferrule (2 pc)
Plastic Tubing	 ¹/₄" plastic tubing → Molded end (Bulb) ¹/₄" compression nut (1 pc)

- **A.** Refrigerator
- **B.** Household water supply line
- **C.** Water Line: must be kept straight.
- **01** Compression Nut (1/4") (Assembled)
- **02** Ferrule (Not supplied)
- **03** Copper tubing (Not supplied)
- **04** Plastic Tubing (Assembled)
- **05** Compression Fitting (Assembled)
- **06** Molded end (Bulb)
- **07** Compression nut (B) (1/4") (Not supplied)
- **08** Plastic Tubing (A) (Not supplied)

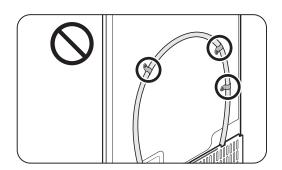

(E) NOTE

If you have to relocate the refrigerator after connecting the water line (C), make sure the joined section of the water line is straight.

2025-03-31 6:27:35

Do not mount the water filter on any part of the refrigerator. This may damage the refrigerator.

- 1. Connect the household water line to the assembled compression fitting.
 - If you are using copper tubing, slip the **compression nut (B)** (not supplied) and **ferrule** (not supplied) on the copper tubing (not supplied) as shown.
 - If you are using **plastic tubing (A)**, insert the molded end (Bulb) of the **plastic tubing** (A) into the compression fitting.

! CAUTION

- If you use plastic tubing (A), do not use it without the molded end (Bulb).
- Leaving the water line disconnected may cause the water valve to produce a buzzing sound over time. If this is the case, make sure that the ice making function is turned "OFF" and do not attempt to use the water dispenser.
- 2. Tighten the compression nut (B) onto the compression fitting. Do not over-tighten the compression nut (B).
- **3.** Turn the water on and check for any leakage. If you find water drops or leakage in the connection areas, turn off the main water supply. Check the connections and, if necessary, tighten.
- **4.** Flush 3 gallons of water through the filter before drinking or using the water from the refrigerator. (Flush approximately 5-6 minutes.) To flush, press a large glass or cup against the water dispenser lever. Fill the glass, empty it, and then repeat.
- **5.** After you turn on the refrigerator, let the ice maker make ice for 1 to 2 days. Over that period of time, throw out the first 1 or 2 buckets of ice the ice maker makes to ensure all impurities have been removed from the water line.

NOTE

Only connect the water line to a potable water source.

- If you have to repair or disassemble the water line, cut off 1/4" of the plastic tubing to make sure you get a snug, leak-free connection.
- You can test the water line quickly using a paper cup. Under normal conditions, the water dispenser can fill a 5 $^{3}/_{4}$ oz. (170 cc) cup in about 10 seconds.

STEP 7 Initial settings

By completing the following steps, the refrigerator should be fully functioning.

- **1.** Plug the power cord into the wall socket to turn the refrigerator on.
- 2. Open the door, and check if the interior light lights up.
- **3.** Set the temperature to the coldest setting, and wait for about an hour. Then, the freezer will be slightly chilled, and the motor should be running smoothly.
- **4.** Wait until the refrigerator reaches the set temperature. Now the refrigerator is ready for use.

STEP 8 Final check

When installation is complete, confirm that:

- The refrigerator is plugged into an electrical outlet and grounded properly.
- The refrigerator is installed on a flat, level surface with a reasonable clearance from walls and cabinets.
- The refrigerator is level and is sitting firmly on the floor.
- The door opens and closes freely, and the interior light turns on automatically when you open the door.

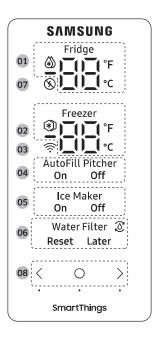

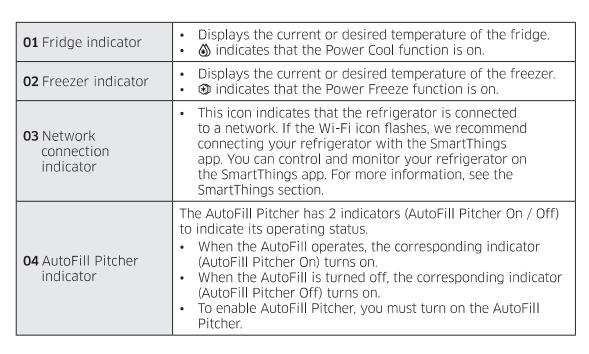

Operations

Control panel

05 Ice Maker indicator	 The ice maker has 2 indicators (Ice Maker On / Off) to indicate its operating status. When the ice maker operates, the corresponding indicator (Ice Maker On) turns on. When the ice maker is turned off, the corresponding indicator (Ice Maker Off) turns on. To enable ice making, you must turn the ice maker on.
06 Water Filter indicator	 S indicates that the water filter needs to be replaced. When you see the S icon, you can replace the water filter and reset the water filter replace alarm, or dismiss the alarm and change the filter later. (For more information, see the "Resetting or dismissing the water filter replacement alarm" section on page 39.
07 Peak Demand indicator	 Displays the status of the Peak Demand function. For more information on the Peak Demand function, see the SMART GRID Function (Demand Response, applicable models only) section.
08 Buttons	 When the display is off, tap any button to wake up the display. Tap ○ to select the desired item on the main panel and to confirm any setting changes. Tap 〈 or 〉 to change the settings of the selected item on the main panel.

NOTE

If the door is left open for 5 minutes, the internal light will blink for 5 minutes and turn off to alert deaf and hard of hearing users that a door is open. Note that this function is normal.

Operations

Setting the desired temperature or function

Select the fridge or freezer and set the desired temperature or function of your choice.

- **1.** Tap any button $(\langle, \bigcirc, \text{ or } \rangle)$ to wake up the display.
 - This step may not apply to some models.
- **2.** Tap \bigcirc until the fridge or freezer indicator blinks.
 - The selected compartment's indicator blinks.
- **3.** Tap \langle or \rangle to select the desired temperature or function.
 - Refer to the table for available selection for each compartment.

Fridge	 Available selection (Fahrenheit): (a) (Power Cool) ↔ 34 °F ↔ 35 °F ↔ 36 °F ↔ 37 °F ↔ 38 °F ↔ 40 °F ↔ 41 °F ↔ 42 °F ↔ 43 °F ↔ 44 °F Available selection (Celsius): (a) (Power Cool) ↔ 1 °C ↔ 2 °C ↔ 3 °C ↔ 4 °C ↔ 5 °C ↔ 6 °C ↔ 7 °C) Power Cool speeds up the cooling process at maximum fan speed. The fridge keeps running at full speed for two and a half hours and then returns to the previous temperature.
Freezer	 Available selection (Fahrenheit): (Power Freeze) ↔ -8 °F ↔ -7 °F ↔ -6 °F ↔ -5 °F ↔ -4 °F ↔ -3 °F ↔ -2 °F ↔ -1 °F ↔ 0 °F ↔ 1 °F ↔ 2 °F ↔ 3 °F ↔ 4 °F ↔ 5 °F Available selection (Celsius): (Power Freeze) ↔ -23 °C ↔ -22 °C ↔ -21 °C ↔ -20 °C ↔ -19 °C ↔ -18 °C ↔ -17 °C ↔ -16 °C ↔ -15 °C Power Freeze speeds up the freezing process at maximum fan speed. The freezer keeps running at full speed for 50 hours and then returns to the previous temperature. To freeze large amounts of food, activate Power Freeze for at least 20 hours before putting food in the freezer.
	NOTE When you use this function, the energy consumption of the refrigerator will increase. Remember to turn it off when you do not need it and return the freezer to your original temperature setting.

- **4.** Wait for 5 seconds or tap \bigcirc to confirm your selection.
 - The selected compartment's indicator stops blinking.

NOTE

- Using Power Cool or Power Freeze increases power consumption.
- When you change the temperature on the panel, the panel displays the actual temperature inside the refrigerator until the temperature matches the temperature you set. Then, the panel displays the new set temperature. Note that it will take time for the refrigerator to reach the new temperature. This is normal. During this time, you do not need to set the temperature again.
- To ensure optimal performance, we recommend setting the temperature to 0 °F (-18 °C) for the freezer, and 37 °F (3 °C) for the fridge.

- The temperature in the refrigerator may rise if you open the door frequently or put a large amount of food into the refrigerator. If this happens, the temperature display blinks until the refrigerator returns to the specified temperature settings. If the blinking continues for an extended time, contact a local Samsung service center for technical assistance.
- While the temperature display is blinking, an alarm may occur. To stop the alarm, tap any button on the display.

Turning on or off the AutoFill Pitcher

You can turn on or off the AutoFill Pitcher in fridge.

- **1.** Tap any button $(\langle . \bigcirc, or \rangle)$ to wake up the display.
 - This step may not apply to some models.
- **2.** Tap \bigcirc until the AutoFill Pitcher indicator blinks.
- **3.** Tap \langle or \rangle to turn on or off the AutoFill Pitcher.

 - Tap < to turn it on.Tap > to turn it off.
- **4.** Wait for 5 seconds or tap \bigcirc to confirm your selection.
 - The AutoFill Pitcher indicator stops blinking.

Turning on or off the ice maker

You can turn on or off the auto ice maker in the freezer.

- **1.** Tap any button $(\langle , \bigcirc, \text{ or } \rangle)$ to wake up the display.
 - This step may not apply to some models.
- **2.** Tap \bigcirc until the Ice Maker indicator blinks.
- **3.** Tap \langle or \rangle to turn on or off the ice maker.
 - Tap < to turn it on.
 - Tap > to turn it off.
- **4.** Wait for 5 seconds or tap \bigcirc to confirm your selection.
 - The Ice Maker indicator stops blinking.

Changing the temperature scale

You can switch the temperature scale between Fahrenheit and Celsius.

- **1.** Tap any button $(\langle, \bigcirc, \text{ or } \rangle)$ to wake up the display.
 - This step may not apply to some models.
- 2. Tap O until the °F and °C symbols on the fridge or freezer blink.
- **3.** Tap \langle or \rangle to select the desired temperature scale.
 - Tap < to select Fahrenheit.
 - Tap > to select Celsius.
- **4.** Wait for 5 seconds or tap \bigcirc to confirm your selection.
 - The °F and °C symbols stop blinking.

Turning on or off the Peak Demand function

You can turn on or off the Peak Demand function. For more information on the Peak Demand function, see the **SMART GRID Function (Demand Response, applicable models only)** section.

To activate or deactivate the Peak Demand function, tap and hold \langle for 3 seconds. When the function is enabled, the Peak Demand indicator (\otimes) turns on with a chime.

Activating or deactivating the Sabbath mode (applicable models only)

The Sabbath mode stays active for 85 hours once it is activated. After that, it will be deactivated automatically.

- To activate or deactivate the Sabbath Mode, tap and hold \bigcirc and \rightarrow simultaneously for 6 seconds. Then, when the display blinks, tap \rightarrow .
 - When the refrigerator is in the Sabbath mode, the buttons, display, and internal lights do not function. The refrigerator and freezer, however, continue to cool.

NOTE

 If the refrigerator powers off and restarts (for example, if there is a power failure), the Sabbath mode remains active. To end Sabbath Mode, you must deactivate it as instructed above.

Activating or deactivating the Cooling Off mode

The Cooling Off mode (also called the Shop mode) is designed for retailers to display refrigerators on a retail floor. In the Cooling Off mode, the refrigerator's fan motor and lights operate normally, but the compressors do not run, so neither the refrigerator nor the freezer becomes cold.

- To activate or deactivate the Cooling Off mode, tap and hold < and > simultaneously for 6 seconds. Then, when the display blinks, press 🔾.
 - When the Cooling Off mode is on, the refrigerator chime sounds, and the refrigerator shows "0" on the fridge indicator and "FF" on the freezer indicator.

Resetting or dismissing the water filter replacement alarm

The water filter replacement icon (②) blinks to alert the user that it is time to replace the water filter. You can replace the water filter immediately and reset the water filter replacement alarm, or dismiss the alarm if you want to change the water filter later.

- **1.** Tap any button $(\langle, \bigcirc, \text{ or } \rangle)$ to wake up the display.
 - This step may not apply to some models.
- **2.** Tap \bigcirc until the Water Filter indicator blinks.
- **3.** Tap \langle or \rangle to select **Reset** or **Later**.
 - If you have changed the water filter, tap < to reset the water filter replacement alarm.
 - If you want to change the water filter later and dismiss the alarm, tap >.
- **4.** Wait for 5 seconds or tap \bigcirc to confirm your selection.
 - The Water Filter indicator stops blinking.

SmartThings

Installation

Visit the Google Play Store, Galaxy Apps, or Apple App Store and search for "SmartThings". Download and install the SmartThings app provided by Samsung Electronics to your smart device.

NOTE

- The supporting software version of the SmartThings app is subject to change according to the OS supporting policy the manufacturer provides. In addition, as for the SmartThings app or the functions that the app supports, the new application update policy on the existing OS version can be suspended due to usability or security reasons.
- The SmartThings app is subject to change without notice to improve usability or performance. As the mobile phone OS version is updated every year, the SmartThings is also updated continually according to the latest OS. If you have enquiries regarding the items mentioned above, please contact us on st.service@samsung.com.
- For improved performance, the SmartThings app is subject to change without notice or discontinued support according to the manufacturer's policy. In addition, further updates on the app or the function in the app may stop due to usability and security reasons, even if updates are currently supported on your OS.
- Recommended encryption systems include WPA/TKIP and WPA2/AES. Any newer or non-standard Wi-Fi authentication protocols are not supported.
- Wireless networks may be affected by the surrounding wireless communication environment.
- If your Internet service provider has registered the MAC address of your PC or modem for identification, your Samsung Smart Refrigerator may fail to connect to the Internet. If this happens, contact your Internet service provider for technical assistance.
- The firewall settings of your network system may prevent your Samsung Smart Refrigerator from accessing the Internet. Contact your Internet service provider for technical assistance. If this symptom continues, contact a local Samsung service center or retailer.
- To configure the wireless access point (AP) settings, see the user manual of the AP (router).
- Samsung Smart Refrigerators support both Wi-Fi 2.4 GHz with IEEE 802.11 b/g/n and Soft-AP protocols. (IEEE 802.11 n is recommended.)
- Unauthorized Wi-Fi wireless routers may fail to connect to applicable Samsung Smart Refrigerators.

Samsung account

You are required to register your Samsung account to use the app. If you don't have a Samsung account, follow the app's onscreen instructions to create a free Samsung account.

Getting started

Turn on the device you want to connect, open the SmartThings app on your phone, and then follow the instructions below.

If a pop-up appears saying that a new device has been found, tap **ADD NOW**.

If a pop-up doesn't appear, tap the + button, and then select the device you want to connect from the list of available devices.

If your device isn't in the list of available devices, tap **Supported Devices**, select the device type (Refrigerator), and then select the specific device model.

Follow the instructions in the app to set up your device. Once setup is complete, your refrigerator will appear as a "card" on your **Devices** screen.

Refrigerator app

Integrated control

You can monitor and control your refrigerator at home and on the go.

- Tap the refrigerator icon on the SmartThings Dashboard or tap the Devices icon at the bottom of the Dashboard, and then tap the refrigerator "card" to open the Refrigerator page.
- Check the operation status or notifications related to your refrigerator, and then change options or settings if necessary.

NOTE

Some options or settings of the refrigerator may not be available for remote control.

Category	Item	Description
Monitoring	Fridge temperature	Displays the desired temperature setting of the fridge.
	Freezer temperature	Displays the desired temperature setting of the freezer.
	Energy monitoring	Checks the accumulated power consumption of the refrigerator for the last 180 days.
	Ice making	You can turn the ice making function on or off.
	Power Cool	You can turn Power Cool on or off, and check the current settings.
	Power Freeze	You can turn Power Freeze on or off, and check the current settings.
Functions	Fridge temperature	You can set the desired temperature of the fridge.
	Freezer temperature	You can set the desired temperature of the freezer.
	AutoFill Pitcher	You can turn the AutoFill Pitcher function on or off.
	Sabbath Mode	You can activate and deactivate the Sabbath mode.
Alarms	Abnormally high temperature	This alarm is triggered when the fridge or the freezer has abnormally high temperatures.
	Door opening	This alarm is triggered if the fridge door or the freezer drawer is open for a specific time.
	AutoFill Pitcher overflowing	If the AutoFill Pitcher function senses an overflow, it triggers this alarm to let you know the status of the overflow.
	Water filter replacement	This alarm reminds you that the water filter must be replaced.

SMART GRID Function (Demand Response, applicable models only)

When the refrigerator operates in SMART GRID (Demand Response) mode, the Energy Management Refrigerator function can control energy usage or delay the operation of some functions to save money when energy prices or demand are the highest.

NOTE

- You can deactivate the SMART GRID (Demand Response) function at any time using the Peak Demand Off function.
- To use the SMART GRID (Demand Response) function, you need a separate contract with your electric utility company.

In addition, to use the Smart Grid (Demand Response) function, you must register for the service with your electric company. The company must have an EMS (Energy Management System) that supports SEP (Smart Energy profile).

Using the SMART GRID (Demand Response) Function

This feature monitors energy prices and demand information from your utility company and sends notifications to the refrigerator to run high energy consuming tasks during offpeak times when electricity costs and demand are lower.

If the refrigerator receives a control signal from the utility company, the refrigerator will display the DAL $^{\sim}$ TALR levels on the refrigerator display and control the power consumption according to the level.

[Exception condition] The **DAL** and **TALR** control signals from a utility company work as long as product performance is maintained.

If the refrigerator receives the SMART GRID (Demand Response) signal (**DAL** or **TALR**), the refrigerator will operate in Delay Appliance Load (DAL) or Temporary Appliance Load Reduction (TALR) mode.

- Delay Appliance Load (DAL): The refrigerator responds to a DAL signal by providing
 a moderate load reduction for the duration of the delay period. This function controls
 functions that consume a lot of energy such as adjusting the Cooling system, running
 the defrost cycle, and making ice.
 - When the refrigerator operates in **DAL** mode, "L3" is displayed on the refrigerator display.
 - DAL mode is automatically deactivated after it lasts for the amount of time stipulated by the DAL signal (max. 4.5 hours) or when the Peak Demand Off key is pressed.
- Temporary Appliance Load Reduction (TALR): The refrigerator responds to a TALR signal
 by aggressively reducing the load for a short time period. This function reduces energy
 consumption by stopping the compressor and controlling the functions that consume a
 lot of energy such as the defrost cycle and making ice.
 - When the refrigerator operates in **TALR** mode, "L4" is displayed on the refrigerator display.
 - TALR mode is automatically deactivated after it lasts for the received duration (max. 15 minutes), or when the Peak Demand Off key is pressed. The mode is immediately deactivated and the refrigerator returns to the normal state when the door is opened or closed, or the dispenser is used.

Peak Demand Off (Override mode)

When you want the refrigerator to ignore the SMART GRID (Demand Response) signal from the utility company, you can activate Peak Demand Off (Override mode).

When you activate Peak Demand Off (Override mode), the refrigerator ignores the SMART GRID (Demand Response) signal and is not controlled by the utility company.

Activating and deactivating Peak Demand Off (Override mode)

- **1.** Tap and hold < for 3 seconds.
- 2. Then the Peak Demand Off (Override mode) icon ((%)) turns on.
- 3. If the refrigerator receives a SMART GRID (Demand Response) signal from the utility company, 'Or' is displayed in the freezer temperature display.
- **4.** To deactivate Peak Demand Off (Override mode), tap and hold ≤ for 3 seconds.
- **5.** Then the Peak Demand Off (Override mode) icon ((3)) turns off.

NOTE

 Alternatively, you can activate or deactivate Peak Demand Off (Override mode) using the SmartThings app and the Energy Management function. See the next page.

Using the Energy Management Function

The Energy Management function enables you to control and monitor your Energy Management refrigerator using the SmartThings app for your convenience.

NOTE

- To use the Energy Management refrigerator functions, you have to install the corresponding app first.
- 1. Operational Status
 - You can check the DR and Peak Demand status.
- 2. Energy Consumption Reporting
 - Shows the accumulated power consumption. Power consumption data is updated every 10 minutes.

NOTE

The energy consumption report may differ from the power consumption specifications of the product depending on the operating environment and the stored food.

- 3. Delay Defrost Capability
 - The Delay Defrost Capability function saves energy by delaying the defrost operation to a time specified by the user. You can configure the time, and this function will save energy during the specified period in a 24 hour cycle. If the time is not set, the function works with the default time settings. The default time settings are below:
 - 6 am to 10 am: 1st. November ~ 30th. April
 - 3 pm to 7 pm: 1st. May $^{\sim}$ 31th. October

To change the time setting for the Delay Defrost Capability

You can change the time setting for the Delay Defrost Capability on the app.

Untitled-34 44 2025-03-31 6:27:40

Provision for Open Access to the Connected Product Requirements

Special features

Beverage Center

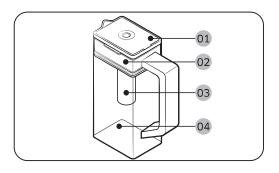

The left fridge door has two handles on the bottom. To use the autofill pitcher, drink cold or purified water, press handle (B) to open the Beverage Center.

- A. Fridge door handle
- **B.** Beverage Center handle

Water pitcher (AutoFill Pitcher) (applicable models only)

Cold, purified water is always ready in the AutoFill Pitcher. You can put tea or fruits in the infuser to enjoy the various infused water you like.

46 English

- **01** Lid
- 02 Infuser holder
- **03** Infuser
- **04** Body

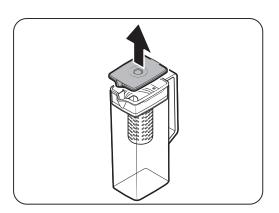

Untitled-34 46

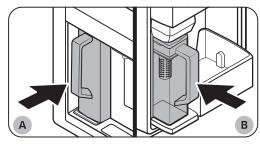

To fill the Water pitcher

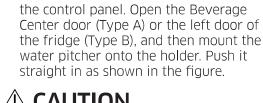

- 1. Grasp a handle groove of the lid, and then pull up to open the lid.
- 2. Put tea leaves or fruit to your taste into the infuser.

If you want to keep the infused water in its initial concentration, turn the AutoFill Pitcher function off.

- A. Type A models
- B. Type B models

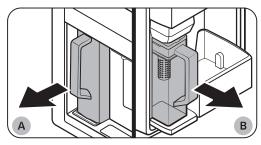

3. Enable the AutoFill Pitcher function on

CAUTION

Make sure the water pitcher fits in the water pitcher holder.

- **4.** Close the door. The water pitcher will start to fill with chilled water a short time later.
- **5.** To drink tea, open the Beverage Center door (Type A) or the left door of the fridge (Type B), and then detach the water pitcher. Pull it straight out.

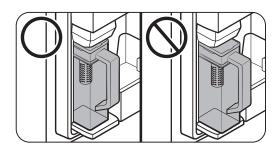

- **A.** Type A models
- B. Type B models

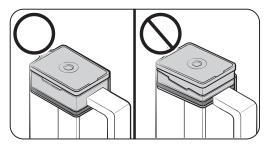

A CAUTION

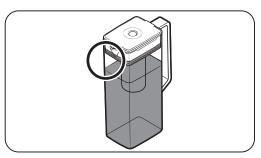

- We recommend consuming fruit infused water within 24 hours. After that, the infused water can spoil over time.
- You must clean the water pitcher after you have consumed the infused water. Also clean the water pitcher if you haven't used it for a long time.

 To prevent the water pitcher from tipping over or leaking, make sure the water pitcher fits in the water pitcher holder.

• To prevent the water pitcher from spilling over or leaking, make sure the infuser holder is properly inserted.

NOTE

48 English

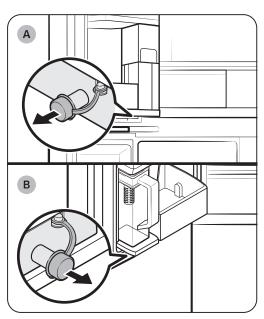

- If the front side (specifically marked area) of the water pitcher has too much moisture, the water pitcher may not fully fill. Remove the moisture, and then try again.
- AutoFill Pitcher function will stop supplying water to the water pitcher if the water pitcher does not fill after a certain amount of time. If this happens, check if the water line is properly connected. Remove and reinsert the water pitcher, and then try again.

Untitled-34 48

NOTE

- Wipe around the water pitcher holder if the water pitcher overflows or leaks.
- Water drops off if the rubber cap is opened
- An alert message appears on the control panel if there is a leak. In case of a leak, open the rubber cap so that the leaked water drains. If the alert message does not disappear after draining, there might be a system failure. Contact your local Samsung service center.

- **A.** Type A models
- B. Type B models

NOTE

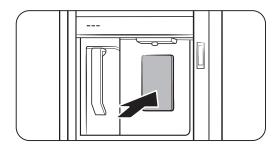

- You must clean the water pitcher after you have consumed the infused water. You must also clean the water pitcher if you have not used it for a long time or left the full pitcher for more than three days.
- If the infuser is not properly cleaned, the scent of the tea or fruits you previously used in the infuser may remain. If you are not going to use the infuser, separate it from the pitcher and store it safely.
- If you have not used the water filter for a long time, pour away the first two pitchers of water. Then, clean the water pitcher thoroughly and use it.

Water dispenser (applicable models only)

To dispense chilled water, open the Beverage Center and press the dispenser lever.

NOTE

- The dispenser will stop dispensing if you keep pushing the dispenser lever for about 1 minute. To dispense more water, release and push the lever again.
- Make sure the glass is in line with the dispenser to prevent the dispensed water from spilling out.
- If you do not use the water dispenser for 2-3 days, the dispensed water may have an abnormal smell or taste. This is not a system failure. Discard the first 1-2 glasses of water.

Water clouding

Water supplied to the refrigerator flows through a core alkaline filter. During this filtering process, the water pressure of the water increases and the water becomes saturated with oxygen and nitrogen. This causes the water to look misty or cloudy temporarily when dispensed. This is normal and the water will look clear after a few seconds.

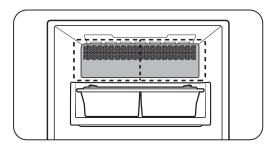

Ice maker

The refrigerator has a built-in ice maker that automatically dispenses ice.

• The overall design and/or accessories may differ with the model.

This product has two types of ice makers.

Choking hazard: Ice may cause choking in small children.

Ice making

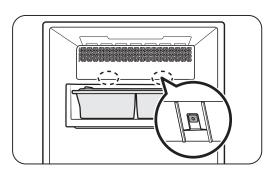

After you have installed your refrigerator and plugged it in, follow these instructions to ensure proper ice making and to keep the ice bucket full of ice.

For first-time use

- Let the ice maker make ice for 1-2 days.
- Discard the first 1-2 buckets of ice to remove impurities in the water supply system.

Diagnosis

Untitled-34 51

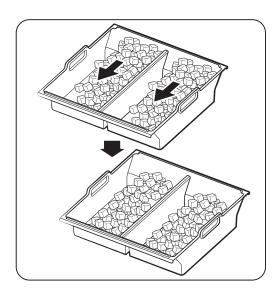

- The overall design and/or accessories may differ with the model.
- If ice does not dispense, first check the status of ice maker using the **Test** button on the bottom of the ice maker.
- Press the Test button on the bottom of the ice maker. You will hear a chime (ding-dong) when you press the button. You will hear another chime if the ice maker is operating properly.

 Ice accumulating on one side of the tray is normal. Arrange the ice evenly in the tray to store more ice.

- Take caution when removing the ice bucket, the ice cubes may pour down from the tilt.
- When reinserting the ice bucket, remove any ice lump that are left over in the tray.

A CAUTION

- Leaving the water line disconnected may cause the water valve to produce a buzzing sound over time. If this is the case, make sure to turn the ice making function (Cubed Ice / Ice Bites) off.
- If the ice making chime rings repeatedly, contact the waterline installer or a local Samsung service center.
- Do not put food in the ice bucket. The frozen food may damage the ice maker, especially when you open or close the door.
- When the refrigerator recovers power after a power failure, the ice bucket may contain a mix of melted and jammed ice cubes, which can prevent the ice maker from working properly. To prevent this, make sure to empty the ice bucket before using the refrigerator.
- Do not put fingers or any objects into the ice maker. This can cause physical injury or property damage.
- Due to sublimation, ice stored in the freezer for a long time gets smaller and then forms large ice chunks. Therefore, if it will be a long time before you use ice, turn the ice maker off as follows.
- Use the new hose-sets supplied with the appliance only. Do not re-use an old hose set.

Maintenance

Handling and care

Ice bucket (applicable models only)

If you do not dispense ice for an extended period, ice may form clumps inside the bucket. If this happens, remove and empty the ice bucket.

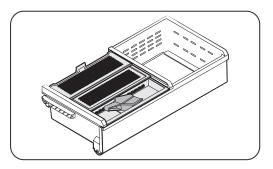

! CAUTION

- To prevent injury, make sure to clean up any ice or water that has fallen on the floor.
- To prevent accidents or injury, do not let children play with the water dispenser or the
- Use only the provided ice bucket. Third-party ice buckets may cause a system failure.

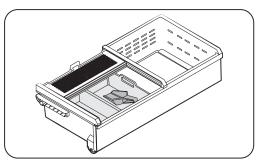

NOTE

- The water pressure required for ice making is between 30-125 psi (206-861 kPa).
- Noise from the ice maker as it produces ice during the ice making process is normal.

Where to keep the scoop

Keep the scoop inside the scoop tray.

You can also store the scoop inside the ice bucket. In this case, sit the handle of the scoop against the side wall of the bucket for easy access.

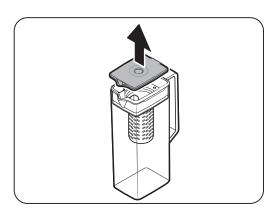

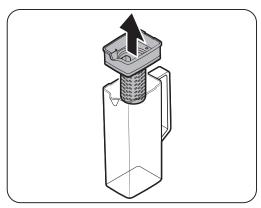

Maintenance

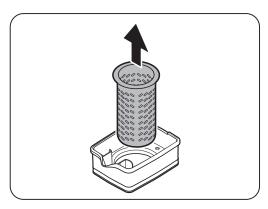

AutoFill Pitcher (applicable models only)

1. Grasp a handle groove of the **lid**, and then pull up to remove.

2. Grasp both sides of the **infuser holder**, and then lift to remove.

- **3.** While slightly twisting the **infuser**, pull it out of the sealed mouth.
- **4.** Clean the **infuser** with neutral agents and running water. Rinse and dry well.
- **5.** Reassemble the AutoFill Pitcher in the reverse order of disassembly.

A CAUTION

The water pitcher and lid are not microwave and dishwasher safe. They can melt or deform if exposed to heat (including hot water). Please hand wash in cool or warm water as needed.

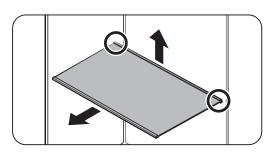

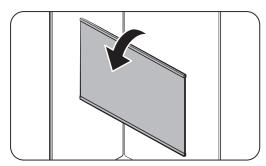

Fridge shelves

The appearance of the shelves differs by model.

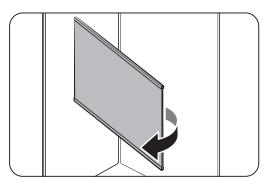

Top shelf

1. Lift the rear side of the shelf with one hand, and then pull it out.

2. Tilt the shelf vertically as shown in the figure.

3. Carefully pull out the shelf as shown in the figure.

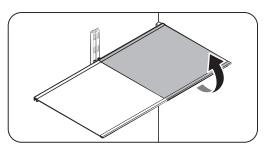

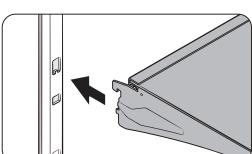

Maintenance

Quick Space shelf *

 To remove a shelf, fully open the corresponding door. Hold the front of the shelf, and then gently lift up and pull out.

NOTE

Do not lift up the shelf fully when removing or reinserting the shelf. The rear wall of the fridge room can be dented.

 To reinsert, hold the shelf at an angle so the front is higher than the back, and then insert the top hook into the top shelf notch. Then, lower the shelf and insert the bottom shelf hook into the bottom shelf notch.

A CAUTION

- The tempered glass shelves are heavy. Use caution when removing them.
- The shelf must be inserted correctly. Do not insert upside down.
- Glass containers may scratch the surface of glass shelves.

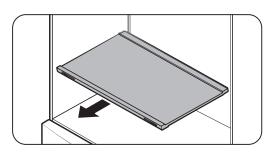

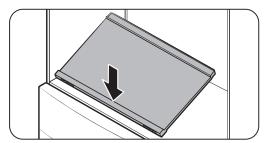

Vegetable shelf

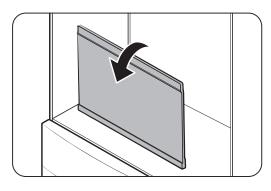

You must remove the Quick Space shelf before removing the Vegetable shelf.

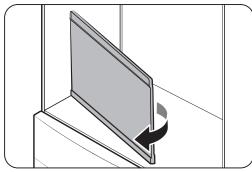

1. Pull the shelf out.

2. Press the front of the shelf to lift the rear side of it.

3. Hold the rear side of the shelf and tilt it vertically.

4. Carefully pull out the shelf as shown in the figure.

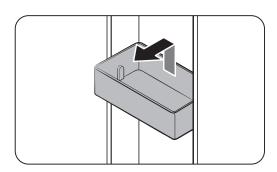

Maintenance

Door bins

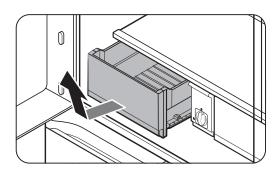

- To remove the door bin, hold the front sides of the bin, and then gently lift up to remove.
- To reinsert, insert the door bin slightly above its final location making sure that the back of the bin is against the door. Hold the rear of the door bin with both hands, and then press down so that it fits snugly.

A CAUTION

- Do not remove a bin that is filled with food. Empty the bin beforehand.
- Use caution when opening the door if the bottom bin contains larger bottles, which may fall over.
- Do not allow children to play with the bins. Sharp corners of the bin may cause injury.

Crisper+ / Fridge Drawers

Gently lift up the front of the drawer and slide out

- We recommend that you remove the door bins before removing the drawer. This is to prevent damage to the door bins.
- To reinsert, insert the drawer into the frame rails and then slide inward.

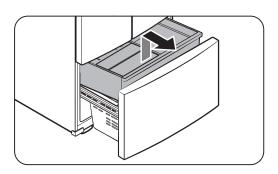

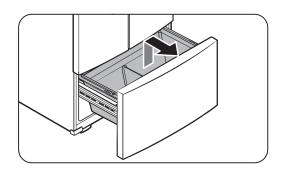

Freezer baskets

Upper basket

- To remove, fully slide open the freezer drawer. Lift up the front of the upper basket and pull up to remove.
- To reinsert, align the front wheels of the upper basket with the end of the lower basket. Slide the upper basket to the front.

Lower basket

- To remove, first remove the upper basket. Then, tilt up the front of the lower basket to pull out.
- To reinsert, put the basket onto the rail assembly rear side first.

A CAUTION

Untitled-34 59

- Do not twist the basket when removing or reinserting the basket. The basket can be scratched.
- To prevent physical injury, property damage, or suffocation, keep children away from freezer baskets that have been removed.
- Do not remove the divider.
- Put the wheels of the upper basket on the end of the rails of the lower basket. Then, slide the upper basket all the way to the front. Otherwise, the drawer will not open or close properly, which will cause frost to build up.

Maintenance

Cleaning

Interior and exterior

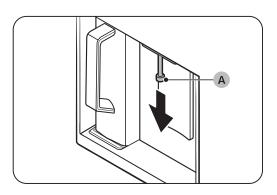

⚠ WARNING

- Do not use benzene, thinner, home/car detergent, or Clorox™ to clean the refrigerator. They may damage the surface of the refrigerator and cause a fire.
- Do not spray water onto the refrigerator. This may cause electric shock.

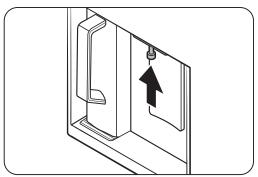

Regularly use a dry cloth to remove all foreign substances such as dust or water from the power plug terminals and contact points.

- 1. Unplug the power cord.
- **2.** Use a moistened, soft, lint-free cloth or paper towel to clean the refrigerator's interior and exterior.
- 3. When done, use a dry cloth or paper towel to dry well.
- 4. Plug in the power cord.

Dispenser nozzle (applicable models only)

- 1. Hold the end of the dispenser nozzle (A).
- 2. While turning the dispenser nozzle (A) left, pull it down to remove it from the dispenser.

3. Clean the dispenser nozzle thoroughly, and then assemble it back.

A CAUTION

- Fully insert the dispenser nozzle, so it is back to its original position.
- Do not use a sponge with rough textures for cleaning the dispenser nozzle.

2025-03-31 6:27:46

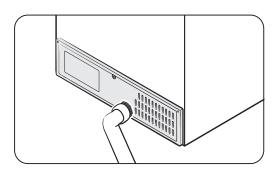

Rubber seals

If the rubber seals of a door become dirty, the door may not close properly and reducing refrigerator performance and efficiency. Use a mild detergent and damp cloth to clean the rubber seals. Then, dry well with a cloth.

Rear panel

To keep cords and exposed parts of the rear panel free of dirt, vacuum the panel once or twice a year.

A CAUTION

Do not remove the rear panel cover. Electric shock may occur.

Replacement

Water filter

⚠ WARNING

- Do not use third-party water filters. Use only Samsung-provided or -approved filters.
- Unapproved filters may leak and damage the refrigerator, causing electric shock. Samsung is not responsible for any damage that may occur from use of third-party water filters.

NOTE

Untitled-34 61

When the water filter is removed, water will not be supplied and therefore the ice maker and dispenser will not operate.

The water filter replacement icon (②) blinks to let you know it is time to replace the water filter. Before replacing the filter, make sure the water supply line is shut off.

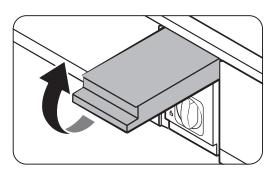

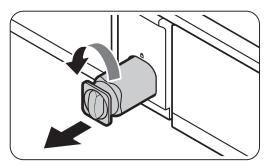

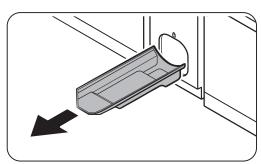

Maintenance

- 1. Shut off the water supply line.
- 2. Open the filter cartridge cover.

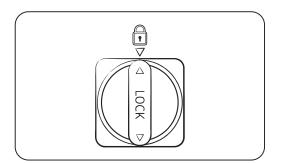

3. Turn the knob of the filter cartridge counter clockwise 90 degrees (1/4 turn). The filter cartridge unlocks.

- **4.** Pull out to remove the cartridge.
 - If the water filter is severely contaminated, the cartridge may not be easy to remove. If that is the case, use force to remove the cartridge.
 - To prevent water leaks from the filter opening, pull the cartridge straight out while removing it.
- **5.** Insert a new filter cartridge. Use only Samsung-provided or approved filters.

- **7.** Close the filter cartridge cover.
- 8. Reset the water filter replacement alarm. (For detailed instructions, see the "Resetting or dismissing the water filter replacement alarm" section on page 39.)
- **9.** When you are done replacing the filter, open the water valve and run water through the dispenser for about 7 minutes. This is to remove impurities and air from the water line.

NOTE

- A newly installed filter may cause the water dispenser to spurt water briefly. This is because air has entered the waterline.
- The replacement process may cause the water dispenser to drip for a short period of time. If it drips, simply wipe up any water on the floor with a dry towel.

Reverse osmosis water filtration system

The water pressure of the water supply system to a reverse osmosis water filtration system must be between 30-125 psi (206-861 kPa).

The water pressure of the reverse osmosis water filtration system to the refrigerator's cold water line must be at least 30 psi (206 kPa). If the water pressure is below these specifications:

- Check if the sediment filter in the reverse osmosis system is blocked. Replace the filter if necessary.
- Refill the water tank in the reverse osmosis system with water.

For more information or servicing, contact a licensed plumbing professional.

Ordering a new filter

To purchase a new water filter, contact a local Samsung service center or visit www. samsung.com/us on the web.

LED Lamps

To replace the lamps of the refrigerator, contact a local Samsung service center.

/ WARNING

• The lamps are not user-serviceable. Do not attempt to replace a lamp yourself. This can cause electric shock.

Door panel (applicable models only)

You can select the door panel you prefer for your BESPOKE refrigerator. Purchase the door panel at a Samsung retail store and an authorized installer will install the panel for you.

A CAUTION

- Disassembling or assembling the door panel on your own may result in product damage or personal injury. If you find any problems with the door panel, contact a Samsung service center
- A service fee may be charged for panel replacement even within the warranty period.

Troubleshooting

Before calling for service, review the symptoms and recommended solutions below. If none of the suggested solutions resolve your problem, please visit our website at www. samsung.com or call Samsung Customer Care at 1-800-SAMSUNG (726-7864). Note that you will be charged for any service visits in which no defects were found.

General

Temperature

Symptom	Possible causes	Solution
Fridge/freezer does not operate. Fridge/freezer temperature is warm.	Power cord is not plugged in properly.	Properly plug in the power cord.
	• Temperature control is not set correctly.	Set the temperature lower.
	Refrigerator is located near a heat source or direct sunlight.	Keep the refrigerator away from direct sunlight or a heat source.
	Not enough clearance between refrigerator and nearby walls or cabinets.	Make sure there is a gap of at least 2.5 inches (5 cm) between the refrigerator back and sides and any nearby walls or cabinets.
	The refrigerator is overloaded. Food is blocking the refrigerator vents.	Do not overload the refrigerator. Do not allow food to block vents.
Fridge/freezer is over-cooling.	Temperature control is not set correctly.	Set the temperature higher.
Interior wall is hot.	Refrigerator has heat-proof piping in the interior wall.	To prevent condensation from forming, the refrigerator has heat-proof piping in the front corners. If the ambient temperature rises, this equipment may not work effectively. This is not a system failure.

Odors

Symptom	Possible causes	Solution
Refrigerator has odors.	Spoiled food.	Clean the refrigerator and remove any spoiled food.
	Food with strong odors.	Make sure strong smelling food is wrapped airtight.

Frost

Symptom	Possible causes	Solution
Frost around the vents.	Food is blocking the vents.	Make sure no food blocks the refrigerator vents.
Frost on interior walls.	Door is not closed properly.	Make sure food does not block the door. Clean the door gasket.

Condensation

Symptom	Possible causes	Solution
Condensation forms on the interior walls.	If door is left open, moisture enters the refrigerator.	Remove the moisture and do not leave a door open for extended periods of time.
	Food with high moisture content.	Make sure food is wrapped airtight.

Water/ice (dispenser models only)

Symptom	Possible causes	Solution
Water flow is weaker than normal.	Water pressure is too low.	Make sure the water pressure is between 30- 125 psi (206-861 kPa)
Ice maker makes a buzzing sound.	The ice maker function is activated, but the water supply to the refrigerator has not been connected.	Turn off the Ice Maker.

Troubleshooting

Symptom	Possible causes	Solution
Ice maker does not make ice.	Ice maker has just been installed.	You must wait for 24 hours for the refrigerator to make ice.
	Freezer temperature is too high.	Set the freezer temperature below 0 °F (-18 °C) or -4 °F (-20 °C) in warm ambient air.
	• Ice maker is off.	Turn on the ice maker.
Ice does not dispense.	Ice may jam if the ice dispenser is not used for a long time (approx. 3 weeks).	If you won't be using the refrigerator for a long time, empty the ice bucket and turn off the ice maker.
	Ice bucket is not properly inserted.	Make sure the ice bucket is properly inserted.
	Water line is not connected properly or water supply is not on.	Check the water installation conditions.

Symptom	Possible causes	Solution
Water does not dispense.	Water line is not connected properly or water supply is not on.	Check the water installation conditions.
	A third-party water filter was installed.	 Use only Samsung-provided or approved filters. Unapproved filters may leak and damage the refrigerator.
	The water filter replacement icon blinks and then stays turned on.	Replace the water filter. Then, reset the water filter replacement alarm. (For detailed instructions, see the "Resetting or dismissing the water filter replacement alarm" section on page 39.)

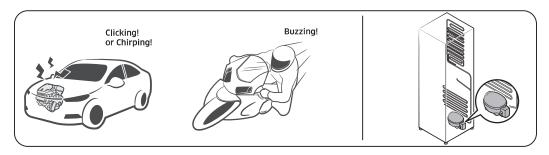

Troubleshooting

Do you hear abnormal sounds from the refrigerator?

Before calling for service, review the information below. If you still have questions about sounds your refrigerator is making, please call Samsung Customer Care at 1-800-SAMSUNG (726-7864). Note that you will be charged for any service visits related to normal operating sounds in which no defects were found.

These sounds are normal.

• When starting or ending an operation, the refrigerator may make sounds similar to a car engine ignition. As the operation stabilizes, the sounds will decrease.

• While the fan is operating, these sounds may occur. When the refrigerator reaches the set temperature, the fan sound will stop.

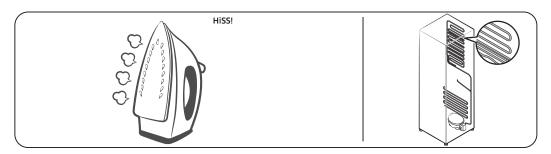

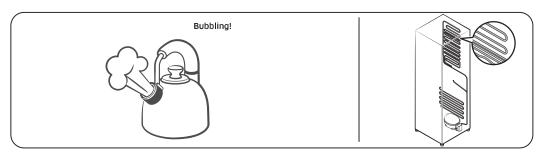

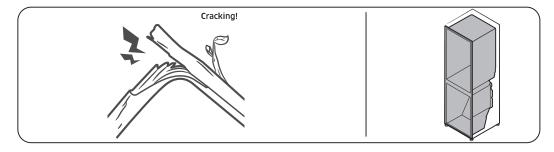

• During a defrost cycle, water may drip on the defrost heater, causing sizzling sounds.

• As the refrigerator cools or freezes, refrigerant gas moves through sealed pipes, causing bubbling sounds.

• As the refrigerator temperature increases or decreases, plastic parts contract and expand, creating knocking noises. These noises occur during the defrosting cycle or when electronic parts are working.

- For ice maker models: When the water valve opens to fill the ice maker, you may hear a buzzing sound.
- Due to pressure equalizing when you open and close the refrigerator door, you may hear a whooshing sound.

Troubleshooting

SmartThings

Symptom	Action
Could not find "SmartThings" in the app market.	The supporting software version of the SmartThings app is subject to change according to the OS supporting policy the manufacturer provides. In addition, as for the SmartThings app or the functions that the app supports, the new application update policy on the existing OS version can be suspended due to usability or security reasons.
The SmartThings app fails to operate.	 The SmartThings app is available for applicable models only. The old Samsung Smart Refrigerator app cannot connect with Samsung Smart Home models.
The SmartThings app is installed but is not connected to my refrigerator.	 You must log into your Samsung account to use the app. Make sure that your router is operating normally. If the Wi-Fi icon on the refrigerator's display is off, this indicates that no network connection has been established yet. In this case, use the SmartThings app to connect and register your refrigerator to the access point (AP) of your house.
Could not log into the app.	 You must log into your Samsung account to use the app. If you don't have a Samsung account, follow the app's onscreen instructions to create one.
An error message appears when I try to register my refrigerator.	Easy Connection may fail due to the distance from your access point (AP) or electrical interference from the surrounding environment. Wait a moment and try again.
The SmartThings app is successfully connected to my refrigerator but does not run.	 Exit and restart the SmartThings app, or disconnect and reconnect the router. Power off the refrigerator, and then power it on again after 1 minute.
The Wi-Fi icon is blinking (奈)	 Connect your refrigerator with the SmartThings app before use. When the connection is made successfully, the indicator stops blinking. If you fail to make connection or don't want to use the app, press and hold the ○ button for 10 seconds. The indicator stops blinking with "O FF" shown on the temperature display.

Smart Grid (applicable models only)

Symptom	Action	
What Do I Need to use the Energy Management and Smart Grid functions?	To use the Smart Grid (Demand Response) and Energy Management functions on your refrigerator, you need the following: Devices A wireless access point (router) A Samsung Energy Management-supported refrigerator A smartphone Registration Connect your refrigerator to your home Wi-Fi network. Register for the EMS service with your electric company. Your electric company must have an EMS (Energy Management System) supporting SEP (Smart Energy profile). App Download the SmartThings app from the Google Play Store, Apple App Store, or Samsung Galaxy Apps. Install and run the SmartThings app on your smartphone.	
Why isn't the Energy Management function working normally?	 Make sure that your home router is operating normally with proper Internet service and connection. Make sure that the refrigerator is connected to the AP (router). Checkpoints Connect your smartphone to the router (AP, Access Point), and then check if you can browse the Internet on the smartphone. 	
Why isn't the Delay Defrost Capability working normally?	Make sure that your home router is operating normally with proper Internet service and connection.
