

Shabbos Mode for GE Ovens 2025

Instructions:

1. Find your model number, which should begin with the following letters and be manufactured after 2018.
2. Determine which category your oven belongs to based on the description in the blue section.
3. Confirm whether a Shabbos Keeper is needed or if the regular Shabbos mode can be used, as approved by the CRC/OU.

Please note that the Shabbos Keeper and built-in Shabbos Mode operate differently, regardless of whether your oven has a certification. The Shabbos Keeper offers enhanced features and automation designed specifically for optimal Shabbos use. You can view the full manual on our website to see what it has to offer.

If you have any technical or halachic questions, feel free to email us at support@zmantechnologies.com or call us at 855-381-0977. We're happy to assist you!

Models listed below are <u>not compatible</u> with the Shabbos Keeper. It can only be used in built-in Shabbos or Yom Tov mode with a certification. Look for a logo or certification on the model and serial number tag to confirm approval. Without this certification, the model cannot be used.	Models listed below have a built-in Shabbos mode approved by CRC/ OU. These models do not require a logo on the model tag for certification. Additionally, you have the option to connect a <i>Shabbos Keeper</i> for added convenience.	Models listed below do not have any certification for built-in modes. To be approved by CRC/OU, these models must be connected to a Shabbos Keeper. *Note: These models may require a one-time software update to ensure compatibility with the Shabbos Keeper.	A Shabbos Keeper needs to be connected to this model in order to be approved by CRC/ OU. For the Double wall oven models, it's important to note that the Shabbos Keeper is exclusively linked to the upper oven and does not have control over the lower oven. *Note: These models may require a one-time software update.
